

## Mini DisplayPort to DVI Dual-Link Active Converter, Mini DisplayPort to DVI (M/F), 2560 x 1600, 6 in.

MODEL NUMBER: **P137-06N-DVI-DL**

### Description

The P137-06N-DVI-DL Mini DisplayPort to DVI Dual-Link Active Converter (M/F) connects a Mini DisplayPort computer to the DVI-D dual-link port on a monitor, projector or television. With a male Mini DisplayPort connector and a female DVI dual-link connector, this video adapter lets you use your existing DVI display and DVI cable instead of buying a new Mini DisplayPort monitor.

Ideal for displaying video on a large monitor or digital sign, this active converter supports DVI dual-link video resolutions up to 2560 x 1600 and DVI single-link video resolutions up to 1920 x 1080 (1080p). Because it's an active converter, the P137-06N-DVI-DL converts both Multi-Mode (DP++) and Single-Mode DisplayPort output. It's recommended for use with graphics cards, such as AMD Eyefinity, that do not output DP++ signals.

Plug and play with no software, drivers or power supply needed. The unit is powered by connecting its built-in USB cable to the Mini DisplayPort device. Gold-plated connectors and contacts ensure excellent conductivity. Integral strain relief ensures the converter and molded connectors last a long time. The P137-06N-DVI-DL fits easily in a briefcase, backpack or laptop bag for connecting on the go.
