\*1 Represents characteristics of the anti-parallel, emitter-to-collector free-wheel diode (FWDI).

\*2 Pulse width and repetition rate should be such that device junction temperature ( $T_j$ ) does not exceed  $T_{j(\text{max})}$  rating.

\*3 Pulse width and repetition rate should be such as to cause negligible temperature rise.

\*4 Case temperature ( $T_C$ ), and heatsink temperature ( $T_f$ ) measured point is just under the chips.
